EDUCATION

The University of Tampa — B.S. in Cybersecurity

Tampa, FL | Jul 2024 – May 2027

Honors: Dean's List, Fall 2025

Wentworth Institute of Technology — B.S. in Cybersecurity

Boston, MA | Sep 2023 – Mar 2024

CERTIFICATIONS

CompTIA Network+ | CompTIA Security+ ce | ISC2 Certified in Cybersecurity (CC) – In Progress (Expected 2026)

Generative AI Fundamentals | Lakehouse Fundamentals (Databricks)

PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS) — Student Builder Campus Leader

Remote | 2026 – Present

- Selected as an AWS Campus Leader to build and demo hands-on projects across core services (EC2, S3, Lambda, IAM, VPC), driving student adoption of cloud and cloud-security practices.
- Author technical labs and walkthroughs via the AWS Builder Center on cloud architecture and security — IAM least-privilege, VPC segmentation, and the Well-Architected Framework.
- Lead workshops on serverless, containerized, and secure-deployment patterns, turning live AWS tooling into practical exercises that build peers' technical proficiency.

TheCoderSchool — Coding Instructor

Tampa, FL | Jan 2026 – Present

- Designed and delivered engaging Python, C#, and Lua curricula for students across all skill levels, driving measurable improvement in coding proficiency.
- Developed customized lesson plans that translated complex concepts into real-world challenges, sharpening students' problem-solving and logical reasoning.
- Built a supportive learning environment using agile methodology to adapt curricula, consistently boosting engagement, confidence, and long-term student retention.

Code Wiz — STEM & Coding Mentor

Andover, MA | May 2025 – May 2026

- Mentored students aged 7–17 in Python, Lua, and Java, achieving a 95% customer satisfaction rate through adaptive, personalized instruction.
- Led hands-on robotics workshops that developed critical thinking and collaborative problem-solving skills across diverse student groups.

Crunch Atlas LLC — Front-End Developer

Manchester, NH | Mar 2024 – Aug 2024

- Engineered dynamic React.js interfaces and Node.js backend services for an AI-driven cybersecurity platform, directly improving UX and system performance.
- Architected and managed scalable AWS high availability cloud infrastructure with monitoring for production data storage, boosting platform reliability and uptime.
- Hardened production environments by configuring Linux servers, enforcing threat detection and incident management protocols, and managing Cisco networking and DNS.

Target — General Merchandise Team Lead

Wilmington, MA | Nov 2020 – Aug 2024

- Led daily operations and onboarding for a team of 10–20 associates, coordinating cross-departmental workflows to sustain productivity, service standards, and efficiency.

Wentworth Institute of Technology — IT Specialist

Boston, MA | Aug 2023 – May 2024

- Diagnosed and resolved hardware, software, and network issues through monitoring and incident management, maintaining high availability across institutional systems.
- Strengthened institutional security posture by implementing threat detection controls and security awareness training to protect sensitive data.

EXTRACURRICULAR ACTIVITIES

Zeta Beta Tau Fraternity, Delta Omicron Chapter — Recruitment Chair

Tampa, FL | Sep 2024 – Present

- Led recruitment strategy and outreach initiatives to attract and retain high-quality candidates, growing chapter membership and strengthening organizational culture.
- Coordinated events and managed candidate pipelines, developing leadership, communication, and organizational skills in a fast-paced environment.

The University of Tampa Cybersecurity Club — Member

Tampa, FL | Sep 2024 – Present

- Developed offensive and defensive cybersecurity skills through lab exercises covering network security, penetration testing, and threat analysis.
- Networked with industry professionals at speaker events and sessions, building career awareness and professional connections in cybersecurity.

SKILLS

Languages & Systems: Python, JavaScript, C#, SQL, Lua, Linux, Kali Linux, Windows, macOS

AI & Data: Machine Learning, Generative AI, Lakehouse Architecture, Markdown

Networking & Security: TCP/IP, DNS, Network Security, Application Security, Threat Detection, Threat Intelligence, Incident Management, OSINT, Web Security, Privilege Escalation, Wireshark, Nmap

Cloud & Development: Cloud Computing, AWS High Availability, Azure Data Lake, Databricks, Docker, Cloudflare, Git, Burp Suite, React.js, Node.js, MySQL, Bash, PowerShell, Technical Writing, Agile Methodology
